

## Ziopharm Oncology to Host Conference Call Today at 8 a.m.

November 12, 2018

BOSTON, Nov. 12, 2018 (GLOBE NEWSWIRE) -- [Ziopharm Oncology](#), Inc. (Nasdaq: ZIOP), today will host a webcast and conference call today, Nov. 12, at 8 a.m. ET.

On the call, management will discuss recent corporate developments and the new collaboration with Regeneron Pharmaceuticals.

The call can be accessed by dialing 1-844-309-0618 (U.S. and Canada) or 1-661-378-9465 (international). The passcode for the conference call is 7763857. To access live webcast or the subsequent archived recording, visit the "Investors Events and Presentations" section of the Ziopharm website at [www.ziopharm.com](http://www.ziopharm.com). The webcast will be recorded and available for replay on the Company's website for two weeks.

### About Ziopharm Oncology, Inc.

Ziopharm Oncology is a biotechnology company focused on next-generation immunotherapies utilizing gene- and cell-based therapies to treat patients with cancer. Ziopharm is advancing the development of two platform technologies designed to deliver safe, effective, and scalable immunotherapies for the treatment of multiple cancer types: Controlled IL-12 platform for Ad-RTS-hIL-12 plus veledimex and *Sleeping Beauty* platform for genetically modifying T cells. Ad-RTS-hIL-12 plus veledimex has demonstrated controlled production of IL-12 in clinical trials leading to an infiltration of T cells to target solid tumors, including rGBM. Ad-RTS-hIL-12 plus veledimex is being evaluated as monotherapy and in combination with immune checkpoint inhibitors, including cemiplimab with Regeneron, as investigational treatment of brain cancer. The Company is also advancing immunotherapies using the *Sleeping Beauty* platform, a non-viral approach to genetically modifying T cells with DNA plasmids to express chimeric antigen receptors (CAR) and T-cell receptors (TCR) to target specific antigens in blood cancers and neoantigens in solid tumors. *Sleeping Beauty* is currently in a clinical trial to generate CD19-specific T cells and supports the Company's very short T-cell manufacturing process encompassed within the technology referred to as "point-of-care". The platform is being advanced in collaboration with MD Anderson Cancer Center to generate CAR-expressing T cells and the National Cancer Institute to generate TCR-expressing T cells.
